⚠️ WARNING: PHOTOSENSITIVITY/EPILEPSY/SEIZURES

A very small percentage of individuals may experience epileptic seizures or blackouts when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or when playing video games may trigger epileptic seizures or blackouts in these individuals. These conditions may trigger previously undetected epileptic symptoms or seizures in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition or has had seizures of any kind, consult your physician before playing. IMMEDIATELY DISCONTINUE use and consult your physician before resuming gameplay if you or your child experience any of the following health problems or symptoms:

- dizziness
- eye or muscle twitches
- disorientation
- any involuntary movement
- altered vision
- loss of awareness
- seizures or convulsion.

RESUME GAMEPLAY ONLY ON APPROVAL OF YOUR PHYSICIAN.

Use and handling of video games to reduce the likelihood of a seizure

- Avoid large screen televisions. Use the smallest television screen available.
- Avoid prolonged use of the PlayStation®3 system. Take a 15-minute break during each hour of play.
- Avoid playing when you are tired or need sleep.

Stop using the system immediately if you experience any of the following symptoms: lightheadedness, nausea, or a sensation similar to motion sickness; discomfort or pain in the eyes, ears, hands, arms, or any other part of the body. If the condition persists, consult a doctor.

NOTICE:

Use caution when using the DUALSHOCK®3 wireless controller and the PlayStation®Move motion controller motion sensor function. When using the DUALSHOCK®3 wireless controller or the PlayStation®Move motion controller motion sensor function, be cautious of the following points. If the controller hits a person or object, this may cause accidental injury or damage. Before using, check that there is plenty of space around you. When using the controller, grip it firmly to make sure it cannot slip out of your hand. If using a controller that is connected to the PS3™ system with a USB cable, make sure there is enough space for the cable so that the cable will not hit a person or object. Also, take care to avoid pulling the cable out of the PS3™ system while using the controller.

WARNING TO OWNERS OF PROJECTION TELEVISIONS:

Do not connect your PS3™ system to a projection TV without first consulting the user manual for your projection TV, unless it is of the LCD type. Otherwise, it may permanently damage your TV screen.

HANDLING YOUR PS3™ FORMAT DISC:

• Do not bend it, crush it or submerge it in liquids. • Do not leave it in direct sunlight or near a radiator or other source of heat. • Be sure to take an occasional rest break during extended play. • Keep this disc clean. Always hold the disc by the edges and keep it in its protective case when not in use. Clean the disc with a lint-free, soft, dry cloth, wiping in straight lines from center to outer edge. Never use solvents or abrasive cleaners.

3D TV DISCLAIMER:

PS3 system software v3.30 or higher, HD 3D television with compatible 3D active glasses and highspeed HDMI cable (sold separately) required for 3D features. Visit www.us.playstation.com/support/3D for details.

Some people may experience discomfort (such as eye strain, eye fatigue, or nausea) while watching 3D video images or playing stereoscopic 3D games on 3D televisions. If you experience such discomfort you should immediately discontinue use of your television until the discomfort subsides.

SCE recommends that all viewers take regular breaks while watching 3D video, or playing stereoscopic 3D games. The length and frequency of necessary breaks may vary from person to person – please take breaks that are long enough to allow any feelings of discomfort to subside. If symptoms persist, consult your doctor.

The vision of young children (especially those under six years old) is still under development. SCE recommends that you consult with a doctor (such as a pediatrician or eye doctor) before allowing a young child to watch 3D video images or play stereoscopic 3D games. Adults should supervise young children to ensure they follow the recommendations listed above.

When using any 3D enabled device with your PlayStation®3 system you should read the instruction manual for that device and check www.us.playstation.com/support/3D for updated information.

ACTIONS

Yaiba's default weapons are his sword, rocket punch and cyber fist flail.

HEARTLESS BLADE
They called it the Tempest Blade - until Yaiba Kamikaze got his hands on it. Wield it for rapid flurries against large groups of enemies. Good all-around weapon.

CYBER ARM
This prototype cybernetic substitute for Yaiba's severed arm delivers enhanced strength, power and torque. Best for concentrated high-damage attacks against individuals or small groups.

FLAIL
Discrete links of an advanced graphite polymer blend are joined for a versatile, high-impact endo-armament. The Flail is highly resistant to electrical current. Useful for crowd control.

Kamikaze Drop	□,△,△,○
Scrub Orbital	□,○,○,△,△

Many more combos with punch and flail can be unlocked with Upgrade Points in the Leveling menu.

DASH
Use dash to dodge enemy attacks, remove zombie torsos which have attached themselves to Yaiba or extinguish flames when Yaiba is on fire. It is also useful to get out of a crowd when surrounded by enemies.

GUARD
Use guard to block enemy attacks. But watch out because some enemies have attacks that are too powerful to block.

Pressing the guard button just before an enemy attack lands will counter its attack. Enemies will slow down for a short period of time, allowing you to cause tons of damage on a defenseless enemy.

GRAB/EXECUTION

R2 button

Yaiba can grab Stiffs to use them as weapons or to solve environmental puzzles.

L2 button
When ▮ displays above an enemy, press **L2** to execute it. Yaiba will perform a brutal kill that adds to his Bloodlust meter, drops health packs, and - for certain enemies - harvests a weapon from them.

ZOMBIE WEAPONS

◉ button

Successfully complete a minigame when executing certain enemies to harvest a special weapon from them. Harvested weapons can only be used a limited number of times, shown by the weapon icon in the lower right of the screen.

ELEMENTAL SYSTEM

Certain enemies and zombie weapons have elemental attributes: fire, electricity or bile. Combine weapon and enemy elements to cause a variety of effects. For example, hitting a fire enemy with an electrical zombie will cause a Static Storm, stunning the enemy. However, make sure Yaiba is not caught in the Static Storm too!

BLOODLUST

Filling up the meter in the upper left of the screen allows Yaiba to trigger Bloodlust. Once in Bloodlust, Yaiba will move extremely fast and do massive damage to enemies for a period of time.

L3 + R3 buttons
CYBER VISION

L1 button

Use Yaiba's cyber vision to display information about the environment around him. Traversal routes, zombie elemental attributes and hints of past events all display in cyber vision.

TRAVERSAL

◉/✕ button

Yaiba can move quickly across stages using a combination of buttons through traversal routes. Colors on anchor points hint at which button to press in order to progress.
